

California OES Weather Threat Briefing

Sunday, May 30, 2021
9:00 AM PDT

Day 1 (Sunday): Increasing temperatures through the holiday weekend will bring moderate to locally high heat risk impacts to the state. On Sunday, the more significant impacts will primarily be across Inland Region.

National Weather Service
Western Region Headquarters
Regional Operations Center
Salt Lake City, UT

WEATHER KEY POINTS

05/30/21 - 06/05/21

Sunday - Saturday

- Mainly dry weather continues through the holiday weekend and much of next week, with the exception of isolated showers and thunderstorms possible over the Sierra and other inland mountains
- Hot temperatures will continue over much of the state through the middle of next week, with widespread 100 degree readings expected across the southern deserts as well as much of the Central Valley. Moderate to locally high heat risk is expected. Poor overnight recovery is also expected, especially Monday and Tuesday.
- Locally gusty winds of 25-40 mph and very dry conditions will produce elevated fire weather conditions each day, especially along mountain slopes
 - These winds will likely be strongest across the southern California mountains and deserts through the middle of the week
 - This also includes some breezy offshore winds expected in northern coastal areas and surrounding mountains Sunday through Tuesday
